Please note we have literally hundreds of songs in our repertoire. We work out a set list to suit each particular occasion.

The lists above show what we might perform at an event with three different style sets. However we often perform in a more mixed fashion, or alternatively concentrate on one particular style. Clients wishing to have a function with an emphasis on "Soul and pop" should consider booking our specialist pop function band.

We are more than happy to perform requests and we always contact clients to arrange these before an event.
